| Bucket Width | 1520 mm | 1670 mm |
| Weight | 440 kg | 480 kg |

The Siromer Loader comes with a 4-in-1 quick release 0.2 cu m bucket, with dual action rams on bucket and lift. This self levelling loader is ready to install with bucket, hydraulic fittings and controls, plus mounting hardware.

By using the float position on the spool valve these loaders are great tools for levelling.

The 4-in-1 configuration can be used as a normal pick-up bucket or as a dozer blade, a leveller or a picker.

Pallet fork and bale spike attachments are also available for these loaders.
