Your Tractor's Best Friend

SIROMER VERGE FLAIL MOWER

Siromer's verge mower is ideal for cutting verges, orchards, grass and can be used for light hedge maintenance.

Featuring hydraulic offsetting, this robust flail mower can be extended or retracted easily from the tractor.

The mower can be angled to suit the job in hand, from vertical to 60 degrees below horizontal, used for cutting ditches.

The verge mowers' flail hammers, rear roller and a compact size allow the flail mower to be used on smooth lawns, uneven verges and through narrow access.

Model	Size (L*W*H)	Working Width	Weight	HP Rq'd	Hammers
M54	1380*680*570	1250	250kg	20-45	20
M55	1580*680*570	1450	271kg	40-50	24

Dual double acting spool valves are required to power this machine.
