SIROMER STONE BURIER

The Siromer stone burier cultivates, buries stones and levels to prepare the perfect bed. Stones, clods, old turf and debris are centrifugally separated out by the heavy duty reverse rotation rotor and thrown to the bottom of the soil profile. A screen at the back of the machine gradually releases the renovated material with the finest soil at the top, this then passes under the mesh roller which gently levels off the soil leaving a bed perfect for seeding. Complete with shear pin PTO shaft

Model	STRUCTURE WEIGHT	TILLING WIDTH	TILLING DEPTH	PTO SPEED	POWER REQUIRED
S63	330kg	950mm	120mm	540 r/min	16-30 hp
S64	355kg	1150mm	120mm	540 r/min	20-35 hp
S65	380kg	1350mm	120mm	540 r/min	30-50 hp
S66	405kg	1550mm	120mm	540 r/min	40-50 hp
